

RuntimeException

```
classDiagram
    RuntimeException <|-- database.DatabaseException
    RuntimeException <|-- specification.InvalidSpecificationException
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'RuntimeException'. Below it are two boxes: 'database.DatabaseException' on the left and 'specification.InvalidSpecificationException' on the right. Two blue arrows point from the bottom of these two boxes towards the bottom of the 'RuntimeException' box, indicating that both 'database.DatabaseException' and 'specification.InvalidSpecificationException' inherit from 'RuntimeException'.

database.DatabaseException

specification.InvalidSpecificationException
